## HOT SHOT'S SECRET DIESEL WINTER ANTI-GEL Cetane Booster and Lubricant

Product Description	"premium diesel" qualities to standard stability, lubricity, winter operability, a is achieved by three different chemica temperature at which wax precipitatio the wax if wax precipitation temperatu keeps the wax dispersed once the clou de-icer is used to keep moisture from	biesel Winter Anti-Gel is a concentrated winter fuel additive that provides premium diesel" qualities to standard diesel fuels in terms of detergency, tability, lubricity, winter operability, and cetane number. The winter operability is achieved by three different chemicals. A wax modifier is used to reduce the emperature at which wax precipitation occurs by -20 °F and reduces the size of he wax if wax precipitation temperature is met. The wax anti-settling agent eeps the wax dispersed once the cloud point is reached and a military grade e-icer is used to keep moisture from freezing and plugging up fuel filters down to -40 °F. This three-step approach greatly reduces the chance of fuel filters lugging in subzero temperatures.	
Applications and Uses	pick-up trucks, farm equipment, and a Ford Powerstroke, Dodge Cummins, G	ctive in all diesel engines: semi-trucks, utos. These include but are not limited to M Duramax, Saab, Volkswagen, and Audi. ends up to B20. Not recommended for 20% biodiesel (i.e., B100).	
Benefits	<ul> <li>Lowers pour point to -65 °F</li> <li>Prevents fuel line freeze-ups down to -40 °F</li> <li>Disperses moisture</li> <li>Boosts cetane up to 5 points</li> <li>Adds lubricity to reduce injector maintenance</li> <li>Improves fuel economy</li> </ul>	<ul> <li>Maintains fuel spray pattern</li> <li>Reduces combustion noise</li> <li>Cuts emissions and black smoke</li> <li>Extends engine life</li> <li>Extends fuel storage life</li> <li>Prevents rust and corrosion in fuel system</li> <li>Improves cold starts</li> </ul>

Where Innovation Lives

Diesel Winter Anti-Gel provides protection against freeze-ups and greatly improves cold temperature performance.

DirectionsDiesel Winter Anti-Gel should be used in every fill-up during the cold winterfor Usemonths.

Recommended treatment rates are 1:1000 for #2 diesel

Diesel Fuel	Hot Shot's Secret Diesel Winter Anti-Gel
8 gallons	1 ounce
25 gallons	3.25 ounces
125 gallons	16 quarts

CAUTION: Use only in #2 diesel up to B20.

Minimum recommended product storage: -10 °F

Packaging

Diesel Winter Anti-Gel is available in:

- 275 gallon totes / 55 gallon drums / 5 gallon containers
- 16 ounce squeeze and round bottles
- 1 quart bottles
- 4 ounce 12-pack

## **Typical Properties**

Property or Test	Result
API gravity @ 60 °F	24.3
Viscosity @ 40 °°F, CS	3.6
Flash point, °F	125
Pour point, °F max.	-45
Appearance	Hazy amber liquid
