

NEW RELEASE

NEW!

SOFTWARE UPDATE

The newest software version for the Edge Products CS and CTS platform is now available through Edge's Fusion internet update tool! This New Version adds amazing new Data Logging features that will allow you to log and graph data so that you can truly understand your vehicle's performance. The all-new software will also enable an Insight CS and CTS product to control Smarty's Power-On-Demand feature. You can now adjust the Smarty Power-On-Demand feature with the touch of a button!

JUICE ATTITUDE **EVOLUTION**

INSIGHT

NEW! DATA LOGGING SOFTWARE

Fine tune your runs on the track, or prolong the life of your tow vehicle by identifying out of range parameters. The CS/CTS Data Logging feature can show you crucial data to help you identify the "sweet spots" as well as potential problems on your driving experience. Shaving a few tenths of a second off your race time, or running a few degrees cooler make all the difference. The data logging feature allows for a comprehensive, accurate picture of the vehicle's condition, such as temperatures, pressures, speed, and more!

CTS

CS

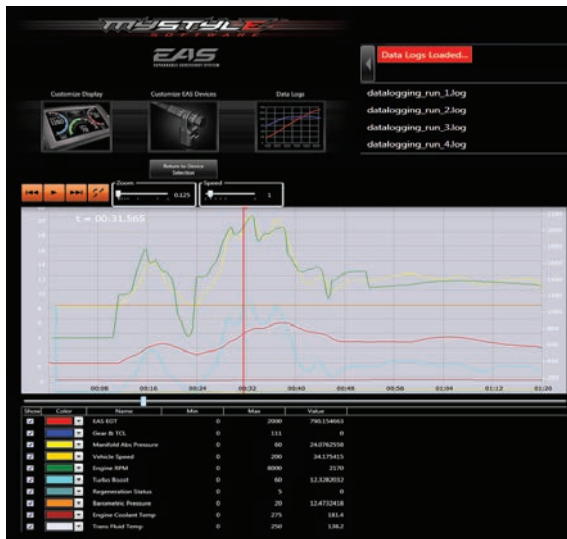

- Log and store up to 10 unique logs at a time
- Log hours of data
- View and graph logs on your PC using the new MyStyle Software
- View all parameters or pick which ones you want to view

NEW! **INSIGHT**

CONTROL SMARTY'S POWER-ON-DEMAND FEATURE USING YOUR EDGE INSIGHT!

Your Dodge is tuned with Smarty, but how are you monitoring your vital engine parameters? Tuning your Dodge and not running an Insight monitor is like taking a knife to a gun fight. The Edge Insight beats any analog gauge system or other digital monitors hands down when it comes to features, monitoring, and maintenance. With our new software update, Smarty users can now control their Power-On-Demand from the Insight monitor. You have a lot of money invested in your Dodge you deserve the best. You deserve Edge!

- Use the Insight to change the Power-On Demand settings of your Smarty programmer with a touch of a button
- If your truck is tuned by Smarty, simply connect the Insight to your OBDII (diagnostic) port and control the Smarty Power-on-Demand tuning that was loaded into your trucks computer!
