

INSTALLATION INSTRUCTIONS
P/N 27336
OIL PAN, FORD 7.3 P/U & VAN

Prior to installation, we recommend giving your Moroso oil pan a final cleaning and inspection. Install a new dipstick flange and gasket as required and double check the oil pickup clearance. We recommend our one piece molded gasket P/N 27293 for use with this pan but RTV silicone will work as well. Depending on which route you go, you must follow the torque specification as required when installing.

Please note: This oil pan includes two separate drain plug washers; one installed on the plug and one loose in the box to be used as a spare. Do NOT stack these washers on top of one another as they are different materials and will likely cause an oil leak.
