

6.0L Diesel Fuel Injector

Motorcraft Remanufactured Competitive Advantages

	Injector Component	Motorcraft	Competition	Motorcraft Benefit
1	Coil Assembly	New	Used	New coil assembly prevents wire fatigue and poor starting
2	Coil Assembly End Caps	Uses end cap with vented slot to prevent "stiction"	No vented slot	Vented slot ensures smooth engine performance in cold start conditions
3	Disk Check Assembly	High pressure sealing surfaces are refinished to OE specifications	Does not refinish or laps sealing surface, which can create leakage paths.	Maintaining less than 2 microns of flatness assures injector long life, high mileage and performance
4	Control Valve Body & Spool	New spools	Used spools	Optimal injector operation
5	Intensifier Body & Plunger	Precision match honed New plungers	Used plungers	Greater durability and reliability
6	Nozzle Assembly	100% flow tested	Not flow tested	Flow testing ensures proper injector performance and emissions

All Motorcraft fuel injector remanufactured components are tested on the same equipment as new components

GENUINE POWER. GENUINE PERFORMANCE. GENUINE PARTS.
