

2019-2020 6.7 Cummins Fuel Filter Conversion Kit

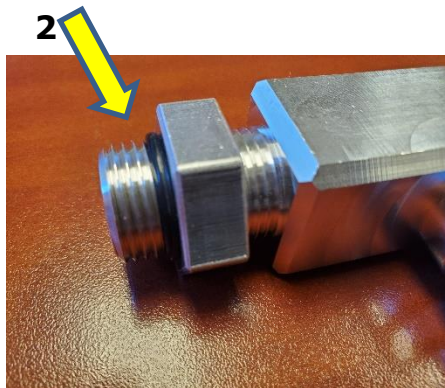

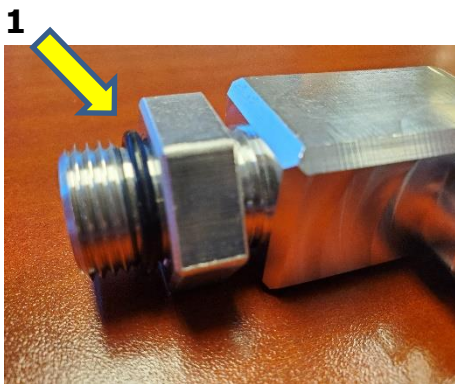

Thank you for purchasing our 6.7 Cummins fuel filter conversion kit. This kit is designed to switch your factory cartridge style filter to a highly interchangeable standard filter. Our kits come with a Cat fuel filter simply for the assured quality however there are many brands that interchange with these filters. Your kit should include the following items:

- Billet Aluminum Filter Head
- Cat Fuel Filter
- 2 Mounting Bolts
- 1 - 13" Piece of 1/2" Fuel Hose w/ 8an Hose End (supply line from filter head to CP3)
- 1 - 12mm Quick Connect 90 Fitting
- 1 - Stainless Steel 1/8" NPT Plug
- 1 - 8an x 12mm Quick Connect Adapter
- 1 - Billet 90 degree adapter assembly
- 1 - 8orb Plug (plugs extra fuel supply port)
- 2 - 8orb x 8an Adapter Fittings

Please verify all items are present. If not, please contact us directly for replacement or additional parts. Please see reverse side of this page for 90 degree adapter assembly instructions. For install instructions please visit the item on our website for install videos!

When performing assembly of the 90 degree adapter please refer to images below.

1. Install the threaded quick connect adapter on to the 90 degree adapter.
2. Note position of the o-ring and the locking nut (image 1 & 2). Turn the nut out against the o-ring just until you feel a slight resistance of the oring.
3. Install the adapter onto the filter head on the port entering the right side of the billet filter head, refer to image 4. Thread the adapter into the filter head until the o-ring contact the filter head. Adjust accordingly to make sure the quick connect adapter is point towards the ground once the unit is install on the engine.
4. Once you have the 90 degree adapter oriented correctly, tighten the locking nut against the filter head. You are now ready to install the filter head assembly onto the truck.

**Thank You,
G & R Diesel**
