**PNs: 98650, 98651, 98652, & 98653**  
**Compatible with 3<sup>rd</sup> Party Custom Tunes\***

**AVAILABLE NOW!**

### PRODUCT DESCRIPTION

Edge's all-new EAS Shift-On-The-Fly (SOTF) allows you to change custom tunes\* "on the fly" utilizing the Insight CS2 or CTS2. The EAS SOTF part numbers cover the 2011-2016 Duramax, 2010-2018 Cummins, and 2011-2019 Power Stroke. Customers can now change tunes right on the screen! Many companies use a voltage signal to change between their 5 tune levels, when tuned with custom tuning software. Instead of drilling a hole in the dash, add the EAS SOTF accessory to an Insight monitor to control custom tunes\* while driving down the road.

### Features/Benefits:

Year	Make	Model	Engine
2011-2019	Ford	F250/350/450	6.7L Power Stroke
2010-2018	Dodge/Ram	2500/3500	6.7L Cummins
2011-2016	Chevrolet/GMC	2500/3500	6.6 LML Duramax

Here is how it works:

1. The EAS Shift-on-the-fly accessory, connected to your Insight CTS2, will control your tune levels for vehicles requiring a switch to control the power levels.
2. Switching occurs by changing voltages between 1v, 2v, 3v, 4v, 5v. Most custom-tuned vehicles run within these parameters.
3. Wire or plug the switch in just as you would your normal Shift-On-The-Fly (SOTF) or Driver-Selectable-Tuning (DST) switch. Then, flash the tune into your vehicle that enables the SOTF/DST functions.
4. Enjoy changing your power levels right through the Insight CS2 or CTS2 screen!
