Certified to the ISO 5011 Air Filtration Standard

Competitive Comparison of Turbo Mouthpieces

for

2004.5 – 2005 Duramax LLY

Manufacturers Tested

Manufacturer	Part Number
S&B Filters	76-1006
AFE	46-60039
LBZ (Stock) Mouthpiece	98011738
LLY (Stock) Mouthpiece	-

ISO 5011, Second Edition

Test Report for Airflow on Turbo Mouthpieces

The test data presented in the following report represents the restriction of airflow. The turbo mouthpieces tested were procured from various distributors or provided by customers. The tests were performed in accordance with ISO 5011.

The Line Graph shows the pressure drop as a function of the airflow rate for the intake elbows. The computer controlled test equipment initiates the test at close to zero (0) cubic feet per minute (CFM) and then increases the CFM gradually until the CFM termination point is reached. During the test, the restriction of each mouthpiece is measured in inches of water ("H₂O") as it relates to the airflow rate (CFM). Visual inspections of turbo mouthpieces are performed to insure against manufacturing flaws.

Definition of Terms & Test Protocol

Restriction

Restriction measures how difficult it is for the air to get through the mouthpiece and is measured in inches of H₂O. Instead of referring to restriction, the industry uses "air flow" to describe the effect of restriction. They say for example, that a High Performance Filter "flows better" than the OEM paper filter. On a line graph, the lower the restriction of a filter the better the air flow.

Note: Testing was conducted based on the ISO 5011 testing standard; however, variances from the actual test procedures may exist. The intent of the testing is to show comparative test results between various products that are intended for similar use. Tests are conducted under a climate-controlled environment; however, changes in temperature and humidity between tests may occur which could alter the actual test results.

Performance Ranking & Summary			
Manufacturer	Mouthpiece Part Number	Ranking	Improvement vs Stock LLY
S&B Filters	76-1006	1	78.6%
LBZ (OE)*	98011738	2	75.9%
AFE	46-60039	3	75.7%

* In order to utilize the LBZ (OE) Mouthpiece on an LLY Duramax, significant modifications are required including cutting of the stock system.

ISO 5011 Test Results for 2004.5-2005 Duramax LLY Turbo Mouthpiece

Performance Ranking & Summary

Manufacturer	Mouthpiece Part Number	Ranking	Improvement vs Stock LLY
S&B Filters	76-1006	1	78.6%
LBZ (OE)*	98011738	2	75.9%
AFE	46-60039	3	75.7%

Average Environmental Conditions & Test Specs

Temperature	69.5 deg F
Relative Humidity	50.2% %
Baro Pressure	29.00 mmHg
Test Stand	#1
Inlet Size	3.75 inches
Housing	-
Contaminant	-
Contam. Lot #	-
Dust Feed Rate	- grams/minute
Rated Flow	612 cfm

Baseline

Part Number	Airflow (scfm)	Net Restriction " of H2O
LLY (Stock)	0.0	0.0
Mouthpiece	305.1	10.0
	456.8	22.6
	611.1	40.7
Test 375	770.8	50.1
Sample 16	849.6	50.1

Detailed Airflow Data

Part Number	Airflow (scfm)	Net Restriction " of H2O	% Less Restrictive than Stock
S&B Filters	0.0	0.0	0.0%
76-1006	307.1	2.3	77.0%
	462.7	4.9	78.3%
	613.0	8.7	78.6%
Test 375	762.7	13.7	72.7%
Sample 18	918.5	19.6	60.9%
AFE	0.0	0.0	0.0%
46-60039	307.0	2.5	75.0%
	460.7	5.5	75.7%
Test 375	612.8	9.9	75.7%
Sample 17	767.0	15.1	69.9%
	924.3	21.8	56.5%
LBZ (OE)*	0.0	0.0	0.0%
Mouthpiece	306.2	2.5	75.0%
98011738	457.8	5.7	74.8%
	611.7	9.8	75.9%
Test 375	763.0	15.0	70.1%
Sample 15	913.4	20.5	59.1%

Note: All testing done using 3.75"ID testing fixture and V-band clamp adapter.

S&B, AFE, and EO LLY tested using same venturi on the inlet, all ports taped off. OE LBZ tested using larger diameter venturi due to the larger ID of that mouthpiece.

Test Stand maxes out @ 50.1"H2O

* In order to utilize the LBZ (Stock) Mouthpiece on a LLY Duramax, significant modifications are required which includes cutting of the stock system.

Resistance to Flow Curve

(A lower restriction curve translates into better airflow.)

S&B Turbo Mouthpiece **2004.5 - 2005 Duramax LLY**

- Improves throttle response.
- Larger internal diameter.
- Smooth unrestricted flow designed using Computational Fluid Dynamics flow simulation software.
- Lower EGTs.

How were the Turbo Mouthpieces tested?

All testing done using 3.75"ID testing fixture and V-band clamp adapter. S&B, AFE, and OE LLY tested using same venturi on the inlet, all ports taped off. The OE LBZ was tested using larger diameter venturi due to the larger ID of that mouthpiece. Test Stand maxes out @ 50.1"H₂O
