QUICK GUIDE

Custom Tuning Process

The calibrator is a company and/or individual that creates custom tunes based off your vehicle's stock files. You will receive a "Dealer Key" from them.

The Insight Pro will read your vehicle's computer and save all the original stock files.

Download the Ignition Update Software and update the device. You will need the "Dealer Key" in order to update.

Let the calibrator know that you have saved stock and updated using ignition. The calibrator will automatically receive your stock file through an online portal specific to them.

The Calibrator will contact you letting you know that they have created the custom tunes and "targeted" your device. This means that the next time you update using Ignition, your device will automatically update with the custom tunes.

Update your device with the custom tunes.

See the "Tuning your Vehicle" section in the user manual.

Read Vehicle Stock

The Insight Pro holds up to 4 custom tunes at a time. Before these custom tunes can be created, you will need to save the vehicle's stock files.

STEP 1 - While viewing the gauge screen, press the Home button.

STEP 2 - On the Main Menu, select the Performance Tuning option.

STEP 3 - Select Read Vehicle. _____

STEP 4 - Follow the on-screen instructions. Once the device is finished reading the files, unplug it from the HDMI cable.

STEP 5 - Refer to the following section.

Loading Custom Tunes

Prior to receiving custom tunes, a professional calibrator will need to be contacted. The calibrator is a company and/or individual that creates custom tunes based off your vehicle's stock files. For more information on how to locate a custom tuner, please log in to our website at: www.edgeproducts.com.

STEP 1 - After saving the stock files to your device, contact the Calibrator and ask for their "Dealer Key".

WRITE DEALER KEY HERE _____

(NOTE: The dealer key is a code you use when registering your device using the Ignition Update Software.)

STEP 2 - Once you have downloaded and installed Ignition to your computer, double click the icon to open the software.

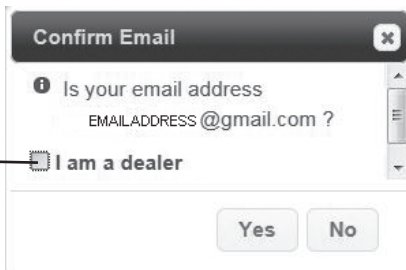

STEP 3 - Connect the Insight Pro to your computer using the supplied USB cable.

(NOTE: Ignition will automatically recognize your device.)

STEP 4 - When the "Update Now?" screen appears in Ignition, select the Yes button.

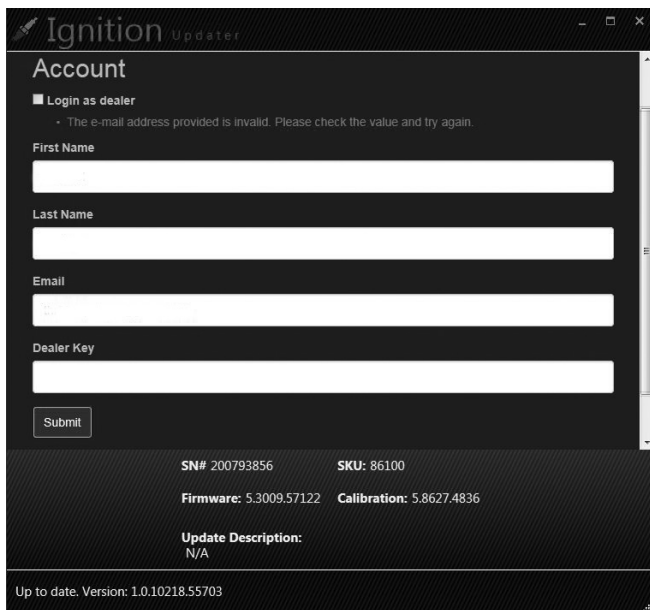

(NOTE: If this is your first time connecting to Ignition, you will be required to register the device. Follow Steps 5 - 7 to register.)

STEP 5 - If you are asked to "Confirm Email" select Yes if it is the email you would like to use. Select No if you prefer to register using another address. DO NOT select the "I am a dealer" box. _____

STEP 6 - When the registration form appears, fill out all required information.

STEP 7 - Click the submit button.

The screenshot shows the 'Ignition Updater' application window. The title bar says 'Ignition Updater'. The main window has a dark background with white text. At the top, it says 'Account'. Below that, there is a checkbox labeled 'Login as dealer'. A message below the checkbox says 'The e-mail address provided is invalid. Please check the value and try again.' There are four input fields: 'First Name', 'Last Name', 'Email', and 'Dealer Key'. Below the input fields is a 'Submit' button. At the bottom of the window, there is a section with device information: 'SN# 200793856', 'SKU: 86100', 'Firmware: 5.3009.57122', 'Calibration: 5.8627.4836', and 'Update Description: N/A'. At the very bottom, it says 'Up to date. Version: 1.0.10218.55703'.

STEP 8 - When the “Update Now?” screen re-appears in Ignition, select the Yes button.

(NOTE: During the update process, your device will send the stock file data to the calibrator.)

CAUTION: Do Not unplug the device until the update is complete.

STEP 9 - Contact the Calibrator and let them know you have updated your device.

(NOTE: They automatically receive the stock files and will work on creating your custom tunes.)

STEP 10 - After the Calibrator lets you know your tunes are ready and available, update your device with Ignition.

(NOTE: The custom tune levels will be added during the update.)
