Read and understand instructions before attempting installation

Step 1

Test fit the grilles into the openings. Remove the radiator cover from the vehicle; then the four 10mm bolts along the top of the grille. The grille has four metal clips along the bottom and two in the center; these secure the grille to the core support. Use a slotted screwdriver to release the clips. Remove the grille.

Step 2

Center the lower billet in place. Install the screws from the front; install a flange bracket, washer and nut from the rear. Tighten the hardware until the billet is held firmly in place. Repeat installation on the upper billet.

Step 3

If a bumper billet has been purchased; install at this time.

Re-install grille assembly and radiator cover back onto the vehicle. *Thank you for purchasing a T-Rex Billet Grille.* 5/9/07
