**Fuel Filter/Water Separator Assembly  
For 2001-2004 and 2005-2010  
GM 6.6L Duramax Engines**

### **Product Information**

Racor is offering a fuel filter / water separator assembly for GM 6.6L Duramax engines.

Racor is the OEM (Original Equipment Manufacturer) supplier of this assembly to GM.

All Racor filters are engineered and manufactured to meet all stringent quality requirements and OEM specifications for correct fit, long service life, and outstanding performance.

### **Product Features**

- OEM tested and proven
- Provides the highest water and particle removal efficiency available
- Biodiesel compatible
- Built in hand primer pump for easy system priming
- Genuine Racor element is a four stage depth coalescing filter comprised of a pre-filter, depth coalescing media, a water droplet release layer, and a separate final water blocking/fuel polishing filter
- Float style water in fuel sensor

### ***How the Product Works:***

The Racor coalescer fuel filter system contains a primary coalescing and a secondary polishing stage. The coalescing stage has multiple layers of specialized media that traps dirt and extracts finely dispersed water out of diesel fuel.

The secondary filter strips away remaining water and polishes the fuel.

The Racor coalescer system provides up to twice the life when compared to standard pleated media filters.
