

Stainless Diesel 4G/5G VGT Cummins Drop-In Turbo Cheat Sheet

Special Notes/Recommendations:

- 1) Maximum recommended boost on these units is 38-40psi
- 2) 4th gen
 - a. The “Tow Boss” 60/60 is the entry level unit here
 - i. Works very well for towing and daily drive at a stock fueling level
 - b. The “Boss” 63/67 is the largest that we would recommend on stock injectors with a hot tune, the “Underboss” 63/64 works very well with a mild or hot tune.
- 3) 5th gen
 - a. If the truck has a stock operating system/fuel then we recommend the 60/60
 - b. If the truck has stock injectors and a mild or tow tune, then we recommend the 63/64 or 63/67.
 - i. The 63/64 will tow better.
 - c. If the truck has stock injectors but a heavy/hot tune then we recommend the 65/71 unit.
 - i. Reference Chris at CT for info on a 65/71, he has one on his personal truck.
 - d. The 68/71 unit needs a larger injector to get it to drive and tow well.
